

What is the MaculaRevive program?

Using cellular medicine, Cutting edge technology, and increasing cell activity, The MaculaRevive slows the progression of Macular Degeneration and in many cases reverses damage already caused to your Macula.

We Provide

- **Cellular treatment fixes root cause.**
- **Advanced technology recedes macular degeneration.**
- **Affordable interest free monthly payments.**
- **Advised by ophthalmologist and optometrist .**

6 Benefits of MaculaRevive program

1. Better vision by reducing Macular dusen and deposits

3. Weight loss and reduced blood pressure

5. Reduced joint pains and prevent Arthritis

2. Anti-aging and reduced stress and mental clarity

4. Prevention and reduction of autoimmune disease

6. Increased energy and strength and maintain muscle

How does MaculaRevive program work?

We collect your detailed medical history, perform at home genetic testing and an at-home blood testing to determine your baseline levels for each of these components:

1. **Increased cellular metabolism:** Helps remove cellular waste and increase oxygen production in the cells. This will prevent future drusen from forming and possibly help reduce current retinal drusen.
2. **Hormone balancing:** Reduces stress hormone release, This will prevent cell and blood vessel damage in the eye.
3. **Reduce Inflammation:** Inflammation can cause further retinal tissue damage, increase oxidative stress and limit waste product clearance leading to more Drusen (Dry AMD) and possible new blood vessel growth (conversion to wet AMD)
4. **Detoxifying the retinal tissue:** Heavy metals and other toxins contribute to oxidative stress, impaired blood flow, disruption of anti-oxidants, impairment of cellular functions and cause inflammation.
5. **Reduce Oxidative stress:** Oxidation causes tissue damage, increases inflammation and slows metabolism all leading to the progression of AMD
6. **Increased retinal blood flow:** Blood carries oxygen, nutrients, antioxidants and helps carry away toxins and waste products. Good blood flow and oxygen counteracts the body's mechanism that try to create new blood vessels as in the case of wet macular degeneration.

We will provide the following as part of the program:

- A nutrition guide for supplements along with diet and lifestyle recommendations will be customized for you.
- Customized nutritional supplement packs can be provided (optional)
- Syntonic therapy to increase metabolic activity
- A micro-current device is provided to: increase metabolic activity. Reduce inflammation, Energize the cell and repair mitochondrial damage. It stimulates blood flow and reduces oxidative stress.
- In home blood testing to set baseline recommendations using biomarkers.
- Connect your personal fitness device to our portal to monitor vitals, sleep and exercise.
- Consultation with Dr. Larsen to optimize program for maximum results.

6 Reasons of choosing MaculaRevive program

1. You have Wet or Dry state Macular Degeneration

3. You are close to Wet state Macular Degeneration

5. Advanced AMD and at a risk of legally blind

2. Family history of Macular Degeneration

4. Diagnosed with Diabetic Retinopathy, Glaucoma

6. Diagnosed with Ritinitis pigmentosa, Stargartz or Best Disease

Customer Reviews

“After two days of use with my left eye with the dry, I noticed my vision having more clarity, acute definition was evident. Also the colors came in a lot more defined.”
Craig after starting with the microcurrent machine.

“Dr. Larsen has been very helpful by addressing my issues with macular degeneration. He has professionally guided me by establishing a protocol that looks to be very promising for improving my eyesight.” -
Larry Chatterly

“After treatments for three days it improved so much that i could read 15 letters more.”
Dr. Wayne Patella
microcurrent treatment for macular pucker
